## Use of suffixes for Schaeffler Group taper roller bearings

**Manufacturer:** FAG

**Design:** Taper roller bearing

**Image 1:** Taper roller bearing with suffix DY

The description on the bearing comprises an international standard number and a suffix as required (e.g. -DY or -DZ). These suffixes are used for traceability purposes and relate to the country of origin. Devices with the same number but different suffixes have the same technical properties and are interchangeable.

See below for examples of identical bearings:

**32310A = 32310DY = 32310DZ**

FAG taper roller bearings have been produced in line with a uniform standard in Schaeffler plants throughout the world since 2006 and meet the highest quality requirements.

Appropriate spare parts can be found in our on-line catalogue at [www.Schaeffler-Aftermarket.com](http://www.Schaeffler-Aftermarket.com) or in RepXpert at [www.RepXpert.com](http://www.RepXpert.com).

Issued 03.2011 (replaces 01.2010)  
**FAG 0014**
