

Work. Learn. Inform.

## **The new REPERT is now online / A powerful Tool for Garages and Distributors**

**LANGEN, 8. April 2015.** The new REPERT is now online. With its online portal, Schaeffler Automotive Aftermarket today starts a new dimension of service for garages and distributors. Whether it's product updates or installation guides – with just a few clicks garage professionals can find everything here that they need for their daily work. In addition, the new portal displays the entire four brand product portfolio – from LuK, INA, FAG and Ruville – for the very first time. After launch in Germany ([www.rexpert.de](http://www.rexpert.de)) the new service portal will be launched in stages in other European countries during this year.

Work, learn, inform – the new REPERT is clearly structured according to these three main topics and has a fresh, new design. Its intuitive menu navigation, with intelligent search processes and links, get users to the information they want in a fast and targeted way. A central feature here is the online catalogue linked with Schaeffler Automotive Aftermarket's entire product portfolio, with all products of the LuK, INA, FAG and Ruville brands.

Other highlights – besides a product search function using OE, article or EAN numbers; the portal also provides descriptions of the products, outlines product benefits, supplies daily product updates, installation guides – product-based, vehicle-specific and non-verbal – and makes important information available about damage diagnosis. Directly linked to every product, and therefore found quickly, are all relevant information media, such as brochures and videos.

Also integrated into the new REPERT is Schaeffler Automotive Aftermarket's training program. Garages, distribution partners, technical support organizations, master-mechanics schools and vocational training centers interested in trainings will find valuable information here like how-to videos, the training content used and organizational details. And there are a surprisingly large number of other features the portal offers as well including an event calendar, an improved bonus shop, the latest press releases and even the dual mass flywheel (DMF) App that displays in a few seconds the torque and rated-values tables for freeplay angle and rock for every

LuK dual mass flywheel. Simply everything a garage professional needs – at a glance. In the unlikely event that information is missing, users can find this via prominently displayed contact data or by simply using the Feedback button.

“With the new REPERT we are continuing the success story of our online portal we established over ten years ago; and giving it a new dimension of service, making it more user-friendly and dialogue-oriented,” says Dr. Robert Felger, Senior Vice President Product & Marketing, Schaeffler Automotive Aftermarket, “REPERT is more than an online portal, REPERT is our service brand for technical live presentations, for training seminars – in short for all of the technical services we offer with our products and repair solutions.”

And by the way, users already registered at the old REPERT can access the new version directly after just a few clicks. Bonus points already acquired will automatically be transferred to the new platform. For those interested parties new to the portal, initial registration is required at no charge.

The new REPERT – everything garage professionals require, at a glance.

The new REPERT – not only user-friendly and dialog-oriented, it's optimally designed for tablets as well.
