

Press Release

New Schaeffler catalog for the Automotive Aftermarket

New edition of the LuK clutch catalog – with added double-clutch applications for Ford and VW

LANGEN, 2016-08-02. **A new version of the LuK clutch catalog for passenger cars and light commercial vehicles (LCVs) is now published and ready for use, effective immediately. Integrated into the catalog are new applications for dry double clutches on vehicles from Ford and the VW Group 2nd generation.**

The new edition has 700 pages with over 3,000 different articles for repairing the clutches of more than 60 vehicle manufacturers. This reference book covers vehicle model-years 1996 to 2016 and achieves a market coverage of over 95 percent of the total vehicle fleet in Western Europe. A big plus is how fast distributors and garage employees can identify replacement parts and repair solutions – whether it's the LuK RepSet and LuK RepSet Pro for semi and fully-hydraulic clutch systems, or the LuK RepSet DMF and the LuK RepSet 2CT. Besides introductory information about the clutch expertise and special tools offered by Schaeffler in the Automotive Aftermarket, the LuK catalog features an impressive non-verbal structure: Vehicle type, model year and article group – including vehicle-specific information – can be found easily using graphic symbols. All information in the catalog is, like always, available in five languages – English, French, German, Italian and Spanish.

Garages can get the new 2016/2017 edition of the LuK clutch catalog for passenger cars and light commercial vehicles at the distribution partners of Schaeffler in the Automotive Aftermarket. More information, say about articles for older vehicles or about the entire portfolio of Schaeffler in the Automotive Aftermarket, can be found in the online catalog that the spare-parts specialist makes available at its online portal for garages at www.repxpert.com.

The Schaeffler Group is a leading global integrated automotive and industrial supplier. The company stands for the highest quality, outstanding technology, and strong innovative ability. The Schaeffler Group makes a key contribution to "Mobility for tomorrow" with high-precision components and systems in engine, transmission, and chassis applications as well as rolling and plain bearing solutions for a large number of industrial applications. The technology company generated sales of approximately EUR 13.2 billion in 2015. With around 84,000 employees, Schaeffler is one of the world's largest family companies and, with approximately 170 locations in over 50 countries, has a worldwide network of manufacturing locations, research and development facilities, and sales companies.
